Bulk Material Handling

DoverMEI's extensive experience in every phase of bulk material handling guarantees specialized solutions for all demands in storage, transfer, and batching. We design and install systems for the textile, plastic, baking, adhesive and chemical industries as well as many others. We provide only the highest quality equipment to serve our customers' bulk handling needs and have the highest non-failure rate in the industry.

- ✓ **Bulk Storage**
 - Dry Storage Silos
 - Liquid Tanks
 - Bulk Bag Systems

- ✓ **Pneumatic Conveying**
 - Engineered Blowers
 - Dust Collectors
 - Rotary & Tapered Airlocks

- ✓ **Batching**
 - Load Cells
 - Level Controls
 - Process Controls

Engineering & Design

DoverMEI's engineering department places priority on initial design in order to facilitate ease-of-use, enhanced performance and maintenance. Our engineers generate innovative solutions for your process challenges. We develop automated and integrated systems that best serve all of our customers' material handling needs. Many of our projects include existing system retrofits, upgrades and interfaces with material handling equipment, regardless of original supplier or manufacturer.

- ✓ **Conceptual System Design**
- ✓ **Mechanical Design**
- ✓ **Electrical Design**
- ✓ **Controls - Design & Programming**

Installation

DoverMEI fabricates each custom-designed complete system. This equates to an efficient pace in installation which translates to a more rapid system start-up.

DoverMEI provides its own personnel for installation and system start-up, enabling us to offer high-quality installations. **Our dedication to this phase includes an on-site Project Manager.**

- ✓ **Full-Time Installation Crews**
- ✓ **On-Site Engineer**
- ✓ **Project Management**
- ✓ **System Start-Up**

Manufacturing

DoverMEI takes great pride in our continued support well after the initial installation. This is the difference between DoverMEI and other companies. We are available to serve your needs 24 hours a day, 7 days a week, and we offer annual preventative maintenance contracts.

DoverMEI also offers safety and Title 5 compliance audits in all areas related to conveyance and bulk material handling.

- ✓ **Preventative Maintenance Programs**
- ✓ **24/7 Service**
- ✓ **Safety Audits**
- ✓ **Title 5 Compliance**

DoverMEI

We remove all logistical slow-downs and outsourcing needs for our customers.

Founded in 1974, Modern Equipment Incorporated continues to be a major and reliable leader in the Material Handling Industry.

Founded in Houston, Texas in 1979, Dover has a unique reputation for accepting and successfully executing even the most difficult material handling challenges.

Together, DoverMEI provides well known innovative products, high quality manufacturing, and excellence installation of products and project management.

The scope of our expertise includes complete system conceptualization and design, custom fabrication and installation, excellent after-market service, and a maintenance program to ensure that your system operates at a maximum level of efficiency and reliability.

DoverMEI also supplies equipment and installs projects internationally. Our products are "engineered for life" and we provide the same level of commitment to all systems we design, install and service in the Southeast. We will work directly with your engineering, maintenance groups and local or regional third party installation providers to assure long term support.
