

## K-ELL

- The K-ELL was developed for Polymer Pellet pneumatic conveying service to reduce degradation issues.
- Removable/replaceable contact plate serves as an inspection access for the convey line. Contact plate includes a proprietary process for minimizing the seat gap.
- Standard Construction:
  - Aluminum Sch.10, Stainless Steel contact plate, white neoprene gasket.
  - Stainless Steel Sch.10, Stainless Steel contact plate, white neoprene gasket.
  - FF Flange 150#, Plain End, T.O.E.
- Standard Sizes stock in aluminum:
  - 6" Sch.10
  - 8" Sch.10
  - Non-stock sizes available 4"Sch10 thru 14"Sch.10, aluminum or stainless.
- Options:
  - Internal Unidirectional Hammered Finish
  - Anodizing
  - K-TEE Lateral
  - Stepped Convey Line Transition
  - Target Box Convey Line Termination
